

On a faunistic record of *Corcobara angulipennis* Moore in the Philippines (Lepidoptera, Noctuidae)

Abstract: On a faunistic record of *Corcobara angulipennis* Moore in the Philippines (Lepidoptera, Noctuidae). *Cesa News* 73: 1-2, 1 fig., 1 map.

This short note deals with the faunistic record of *Corcobara angulipennis* (Noctuidae) in the Philippines.

Key words: *Corcobara angulipennis*, Noctuidae, Lepidoptera, fauna, distribution, Philippines, Bohol.

Moore (1882) described and illustrated "*Corcobara angulipennis*" as a new genus and a species, based upon the material collected by Mr. Atkinson from India. Later, the same author, Moore ([1885]) described and illustrated another species of his genus *Corcobara* Moore, i.e., *thwaitesi* from Ceylon together with the morphological information of its larva and pupa. Hampson (1895: 69-70, fig.37) treated the species with two synonymous names proposed by Moore, i.e., *angulipennis* Moore, 1882 and *thwaitesi* Moore, [1885]. He also mentioned that the species ranges from Ceylon, Sikkim to Singapore.

In the modern literature, the genus *Corcobara* and its type-species *Corcobara angulipennis* are valid taxa (Poole, 1989; Holloway, 2005).

This little known species is apparently rare in the lowlands of the tropics. Semper (1901) informed that it was represented in Luzon and Mindanao by two specimens. The author recorded it in Bohol Island by a single male (**Fig.1**). *Corcobara angulipennis* has been recorded in Sri Lanka (Moore, 1882, [1885]); Sikkim (Darjeeling), Singapore (Hampson, 1895); Malaysia (Borneo), Sabah (G. Marapok), Indonesia (Kalimantan (Samarinda), Sumba), Solomon Islands (Holloway, 2005); the Philippines (Luzon, Mindanao) (Semper, 1901: 591-592) and Bohol Island (present record) (**Map 1**).

Material studied: 1 ♂ The Philippines, Bohol Island, Carmen, Chocolate hills 370m, 13 12 1996 A. Koçak leg. (coll. Cesa). Fore-wing: 22 mm, wing span: 44 mm.

Abstract: List of the species and subspecies illustrated in the Cesa publications on the Old World *Lepidoptera*. *Cesa News* 73: 3-44.

This paper deals with the references to the illustrations of the species group taxa of the Old World *Lepidoptera*, published by the authors in the Cesa serials. Totally 1281 species and subspecies of 39 families are listed alphabetically. References to the published illustrations are given briefly, i.e., date of publication, abbreviations of the journals, volume/number, plates/figures and explanation. The species group taxa mentioned here are the representatives of the fauna of the following Old World countries: Turkey, South Africa, Thailand, the Philippines. Among them, several references to the illustrations of the type-series are also given.

Key words: List, species, subspecies, Old World, Turkey, South Africa, Thailand, the Philippines. *Lepidoptera*, *Acraeidae*, *Adelidae*, *Aganaiidae*, *Arctiidae*, *Argynniidae*, *Brahmaeidae*, *Callidulidae*, *Choreutidae*, *Cossidae*, *Ctenuchidae*, *Danaidae*, *Drepanidae*, *Endromidae*, *Ethmiidae*, *Eupterotidae*, *Gelechiidae*, *Geometridae*, *Hesperiidae*, *Lasiocampidae*, *Libytheidae*, *Limacodidae*, *Lycaenidae*, *Lymantriidae*, *Noctuidae*, *Notodontidae*, *Papilionidae*, *Pieridae*, *Pyralidae*, *Riodinidae*, *Saturniidae*, *Satyridae*, *Scythridae*, *Sphingidae*, *Thyatiridae*, *Thyridae*, *Tineidae*, *Tortricidae*, *Uraniidae*, *Zygaenidae*.

The following list deals with the references to the illustrations of the species group taxa of the Old World *Lepidoptera*, published by the authors in the Cesa¹ serials. Totally 760 species (1281 species group taxa) of 39 families are listed alphabetically according to the specific names. References are given briefly, i.e., date of publication, abbreviations of the journals, volume/number, plates/figures and explanation. All the figures are in pdf format and accessible in the Internet Archive. All the images were taken by the first author and currently preserved in the Cesa archive within the info-system.² The species group taxa mentioned here are the representatives of the fauna of the following Old World countries: Turkey (663 taxa), South Africa (150 taxa), Thailand (388 taxa), the Philippines (237 taxa). Among them, several references to the illustrations of the type-series are also given.
